BURDEN STATEMENT FOR DATA REFERENCE SHEET
(EPA Form 8570-20; OMB Form No. 0070-0060)

The public reporting burden for this collection of information is estimated to average one hour per completed Data Reference Sheet. This includes reviewing instructions, identifying pertinent references, and citing the references on this instrument. It is estimated that approximately eight (8) hours are required to prepare a complete set of references for an initial application to register a "typical" or "average" chemical. After that, additional supporting references may be necessary but would not require the number of references necessary for an initial application to register. Send comments regarding this burden, to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460; and to the Office of Management and Budget, Paperwork Reduction Project (2070-0060), Washington, DC 20503
